Software Developer focused on building modern full-stack web applications. Skilled in designing secure authorization systems, developing reusable UI components, and integrating AI-driven capabilities into production applications.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, C++ , PHP, SQL, HTML5, CSS3
Frontend:	React.js, Next.js, Redux, MobX, Tailwind CSS, Material UI, Bootstrap
Backend & APIs:	Node.js, Express.js, Laravel, REST APIs, GraphQL, JWT, OAuth 2.0
Databases:	PostgreSQL, MySQL, MongoDB, Prisma ORM, Mongoose
Tools & Practices:	Git, GitHub, Docker, Postman, Firebase, Vercel, VSCode, Cursor, CI/CD, Unit Testing

PROFESSIONAL EXPERIENCE

Full Stack Developer <i>Zlines</i>	Dec 2025 – Present <i>Ahmedabad, India</i>
--	--

- Built reusable frontend components, shared UI utilities and optimized data-fetching strategies, reducing redundant API requests and improving application performance.
- Designed a module-level **role-based access control (RBAC)** system spanning multiple modules and **6** user roles, removing **90%** of manual access requests.
- Optimized the generation pipeline with query batching and parallel I/O, cutting processing time by **50%**.

Product Manager <i>ICICI Bank</i>	June 2023 – Dec 2023 <i>Ahmedabad, India</i>
---	--

- Authored Business Requirement Specifications and **300+** test cases across **3** trade-finance products.
- Led the **TradeOnline** changes and **InstaEPC-to-NTS** and **Helpdesk-to-iCRM** migrations, cutting turnaround by **30%**.
- Drove UAT across **100+** scenarios, identifying and resolving defects before release and improving product stability.

PROJECTS

TripAI — AI Travel Itinerary Generator <i>Next.js, TypeScript, Groq API, PostgreSQL, Prisma</i>	GitHub Live Demo
--	--

- Built an LLM-powered generator returning day-wise plans with attractions and travel times in under **8s**.
- Engineered structured prompting with JSON schema validation and response caching, providing structured output.
- Saved itineraries on Neon PostgreSQL with Prisma; added interactive map view along with Google Maps navigation.

Money Mate — Personal Finance Tracker <i>MERN Stack, MongoDB, Express.js, React.js, Chart.js</i>	GitHub Live Demo
---	--

- Developed a MERN expense tracker with JWT auth and category-based tracking, handling multiple transactions.
- Optimized MongoDB aggregation pipelines and added compound indexes, cutting dashboard query time by **45%**.
- Integrated Chart.js to provide interactive financial visualizations and improve insights into spending patterns..

Estate Edge — Real Estate Marketplace <i>MERN Stack, Redux, Firebase, JWT, Google OAuth</i>	GitHub Live Demo
--	--

- Built a property marketplace with listings, multi-image upload and filters on price, location and type.
- Secured the app with JWT and Google OAuth 2.0; Firebase Storage pipeline cut image payload size by **60%**.
- Developed responsive UIs with React.js, Tailwind CSS, and managed state with Redux for smooth user interactions.

EDUCATION

Master of Technology, Indraprastha Institute of Information Technology (IIIT Delhi) <i>Computer Science, CGPA - 7.32</i>	July 2021 - June 2023 <i>New Delhi, India</i>
--	---

Bachelor of Engineering, Silver Oak College of Engineering and Technology (GTU) <i>Computer Engineering, CGPA - 9.52</i>	July 2017 - June 2021 <i>Ahmedabad, India</i>
--	---
